The wind that shakes the phones

Contacting those that we have lost

I. _____¹

Our relationship with grief is a complicated one, and trying to come to terms with that can be impossible to achieve. Over the years, kind-hearted souls have come up with all matters of ways in which those who are grieving can ease their pain, and one of these ideas is the wind phone.

II. _____²

The concept of the wind phone came from Itaru Sasaki, a garden designer living in Japan. Sasaki had lost a cousin to cancer and was looking for a way to maintain a connection with them. For this, he installed an old-fashioned phone in his garden, but he did not connect it to any wires. Sasaki discovered that the whole process of talking into an obsolete phone comforted him during the dark days.

III. _____³

The tragedy was to strike the same area on a gigantic scale in 2011 when over 15,000 people lost their lives to a gigantic earthquake and tsunami. This event pushed Sasaki to open his wind phone to the public and ever since this generous act, his phone has received over 30,000 visitors. After this, the concept of the wind phone started to become more attractive to those dealing with loss.

IV. _____⁴

The chance to say things that couldn't be said proved to be attractive to many, and wind phones started turning up in different locations all over the planet. Worldwide there are believed to be over 200 locations in which you can come across a wind phone, and people travel from miles around to speak into one.

V. _____⁵

A special wind phone has been set up beside an old church in the state of Connecticut in America. The Reverend of the church has said that the phone has become really popular. The phone itself is connected to a simple wooden post beside a gravel path and next to it is a sign that says- "This phone will never ring. It is connected by love to nowhere and everywhere."

VI. _____⁶

In the UK, wind phones have been gradually catching on and you can now find them in a number of diverse locations. From a cliffside in Anglesey to a hospice in Stourbridge, the idea seems to appeal to so many different people. The phone in Anglesey is particularly gorgeous as it looks out over the Irish Sea and is hidden among some craggy rocks. It is unclear who set up this particular phone, but it has a dedication to someone called "Paul Brown" and states that it is for "everyone who has lost a loved one".

VII. _____⁷

The death of someone close to us is undoubtedly one of the most difficult times of our lives, and while the wind phone may seem superficial to some, to others it offers them an opportunity to process the multitude of emotions that come along with grief.
